

Get the most out of your K-CUP® Reusable Coffee Filter

1. Open the Filter Holder by turning the lid counter-clockwise .
2. Wash the Filter Holder, lid and Filter Basket with warm soapy water prior to first use, then rinse and dry thoroughly.
3. Remove the K-Cup® Holder from your brewer. To do this, first lift the handle of the brewer, and then grasp the outside housing of the K-Cup® Holder with the thumb and index finger of one hand and push up from below with the index finger of your other hand while holding the housing firmly.
4. If you are using the MY K-CUP® Reusable Coffee Filter, please make sure that you are using a course-drip grind. We would be happy to grind the coffee for your convenience.
5. Fill the Filter Basket with your desired amount of coffee. In general, we recommend 2 tbsp. of coffee for every 6 oz. of water used. The basket (filled to the top of the mesh) holds approximately 2.5 tbsp. of coffee so that you can adjust to your personal preferences. There are line markings on the inside of the filter that designate 1 tbsp. and 2 tbsp. Do NOT fill the Filter Basket past the top of the mesh or tamp the grinds. Be sure there are no coffee grinds remaining on the upper rim of the filter.
6. **For the most comparable Dunn Bros Coffee experience, it is preferred that you use the 5.75oz. or 6 oz. brew setting. Using a larger brew setting will lead to a more watery, or weaker, cup of coffee.**
7. Place the Filter Basket in the Filter Holder and slightly twist the lid, turning clockwise.
8. Lace the Filter Holder in the K-Cup® Assembly Housing in the brewer (remember, you must remove the K-Cup® Holder first).
9. Lower the handle and brew as you normally do by pressing the desired brew size button.
10. After brewing, lift the handle and remove the Filter Holder from the brewer.
11. Open the Filter Holder by turning the lid counter clockwise. Lift the Filter Basket, discard the grounds and rinse out the Filter Basket and Holder. The Filter Holder and Filter Basket may be HOT so please use caution.
12. To replace the brewer's original K-Cup® Holder, lift the handle of the brewer and place the K-Cup® Holder into the Assembly Housing, align the three holder tabs with the corresponding housing slots, and press the holder into the housing to snap it into place.
